16. Please explain your ratings above, especially if you have AI tools for "other" types of work. *

I used AI to generate testing since I had no experience with testing at all and a lack of time. I used AI to give suggestions when I was writing comments in the documents, and I checked and wrote in more detailed sentences. I used AI in coding some parts of the applications and then modified some syntax and made css. Code analysis from AI was entirely for the purpose of efficiency when adding comments to many files.
